PROFESSIONAL SUMMARY

Full-Stack Developer skilled in the MERN and Next.js ecosystem, with two live applications featuring real payment integration and secure multi-provider authentication (OAuth, JWT). Proficient in RESTful API design, MongoDB, and shipping via CI/CD, with hands-on experience debugging session management and App Router issues.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript
Front-End: HTML5, CSS3, React.js, Redux, Next.js, Tailwind CSS
Back-End: Node.js, Express.js, RESTful APIs, OAuth/JWT Authentication, Payment Integration
Database: MongoDB, Mongoose ODM, MySQL
Tools & Platforms: Git, GitHub (Version Control), npm, VS Code, Postman (API Testing), Vercel, Docker

EXPERIENCE

Web Development Intern, SkillCraft Technology July 2025 – September 2025

Remote | React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

- Implemented JWT-based authentication (registration, login, persistent sessions) with bcrypt password hashing, and added role-based access control across **2 user roles** to restrict protected routes and resources.
- Created the backend for an Employee Management System: RESTful API endpoints providing full CRUD over employee records in MongoDB, with server-side input validation before persistence, and tested all routes in Postman.
- Developed a React e-commerce storefront with **20+ products**, a cart with real-time total and quantity updates, and client-side sorting and filtering to speed up product discovery.

PROJECTS

Travel-Log, Travel Journal & Discovery Platform

(Next.js, NextAuth, MongoDB, Cloudinary, REST APIs) | Live Demo | GitHub Repo

- Architected a full-stack, responsive travel journaling platform for publishing geotagged travel logs with cover photos, hidden gems, and tips; discovery via an interactive Mapbox map, search, and category filters; Google Lighthouse score **90+**.
- Implemented NextAuth OAuth 2.0 (GitHub/Google) with automatic user provisioning; integrated Cloudinary for direct browser-to-cloud image uploads; built REST API routes, verified via Postman.
- Designed a MongoDB indexing strategy (createdAt index, Mongoose .lean()) that cut API response time **41% (887ms → 527ms)** across **8,000+ records**, eliminating collection scans; shipped via Vercel CI/CD with SSR for SEO-friendly URLs.

GetMeACoffee, Creator Funding Platform

(Next.js, NextAuth, MongoDB, Razorpay, Server Actions) | Live Demo | GitHub Repo

- Built a full-stack creator monetization platform with personalized /username pages and real-time Razorpay payments, backed by a MongoDB schema for users, profiles, and transactions; responsive Tailwind dark-theme UI, Lighthouse score **90+**.
- Engineered server-side Razorpay webhook signature verification to block spoofed/replayed payments; added collision-safe username generation and a live top-10 supporters leaderboard with names/messages.
- Optimized profile lookups with compound MongoDB indexing, cutting lookup time **81% (27ms → 5ms)** across **5,000+ records**; tested full payment flow on 10+ Razorpay sandbox transactions; deployed via Vercel CI/CD.

EDUCATION

Greater Noida Institute of Technology (GGSIPU) September 2022 – June 2026 | Greater Noida, India
Bachelor of Technology in Computer Science Engineering CGPA: 7.88 / 10.0

ACHIEVEMENTS

- Solved **200+ algorithmic problems** in Java across LeetCode, GeeksforGeeks and takeUforward, strengthening core data structures and problem-solving skills.
- First-authored a paper, "CampusConnect: A Centralized Web Platform for Discovering Student Opportunities," International Journal of Computer Science Languages (IJCSL), Vol. 4, Issue 2, 2026, ISSN: 3048-944X.
- Secured a **Top 40** rank at HackWithDelhi (2024); advanced to the online round of Code Veda 2025, competing among **6,000+ participants**; also competed in Smart India Hackathon 2025 and Troubleshoot Ideathon 2025.
