PROFESSIONAL SUMMARY

Full-Stack Developer skilled in the MERN and Next.js ecosystem, with two live applications featuring real payment integration and secure multi-provider authentication (OAuth, JWT). Proficient in RESTful API design, MongoDB, and shipping via CI/CD, with hands-on debugging of real issues in session management and App Router architecture.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript
Front-End: HTML5, CSS3, React.js, Redux, Context API, Next.js, Tailwind CSS
Back-End: Node.js, Express.js, RESTful APIs, OAuth Authentication, JWT, Payment Integration
Database: MongoDB, Mongoose ODM, MySQL
Tools & Platforms: Git, GitHub (Version Control), npm, VS Code, Postman (API Testing), Vercel, Docker

EXPERIENCE

Web Development Intern, SkillCraft Technology

July 2025 – August 2025

Remote | skillcrafttech.com

- Developed 3 vanilla JS (ES6+) apps: a stopwatch with event-driven DOM manipulation and state management; a landing page built with responsive web design using CSS3 Flexbox, Grid, and media queries; and a quiz app with real-time score tracking and localStorage persistence.
- Wrote modular, reusable JavaScript functions and responsive CSS architectures that directly translated into faster React component design and cleaner Next.js page structures.
- Debugged DOM state edge cases and timing bugs without framework abstractions, solidifying the underlying mechanics now applied to React state logic and Next.js App Router session handling.

PROJECTS

Travel-Log, Travel Journal & Discovery Platform

(Next.js, NextAuth, MongoDB, REST APIs) | [Live Demo](#) | [GitHub Repo](#)

- Architected a full-stack travel journaling platform with Next.js and MongoDB, enabling users to publish detailed travel logs with cover photos, hidden gems, and travel tips, and explore others' via search and category filters.
- Implemented NextAuth OAuth (GitHub/Google) with auto user provisioning and direct browser-to-Cloudinary uploads for cover photos, and tested endpoints via Postman for reliability.
- Improved API response time 41% (887ms → 527ms) via createdAt indexing and .lean() queries, eliminating collection scans across 8,000+ records; shipped via Vercel CI/CD.

GetMeACoffee, Creator Funding Platform

(Next.js, NextAuth, MongoDB, Razorpay, REST APIs) | [Live Demo](#) | [GitHub Repo](#)

- Built a full-stack creator monetization platform with a Tailwind dark-theme UI and personalized /username pages, powered by Razorpay real-time payments and a MongoDB schema for users, profiles, and transactions.
- Engineered server-side signature verification to block spoofed payments, collision-safe username generation, and a live top-10 supporters leaderboard with fan names and messages.
- Cut profile lookup time 81% (27ms → 5ms) via compound MongoDB indexing across 5,000+ records; validated 10+ transactions in QA, and deployed via Vercel CI/CD with SSR for SEO-friendly URLs.

EDUCATION

Greater Noida Institute of Technology (GGSIU)

Sept 2022 - June 2026 | Greater Noida, India

Bachelor of Technology in Computer Science Engineering

CGPA: 7.88 / 10.0

ACHIEVEMENTS

- Solved 150+ algorithmic problems across [LeetCode](#), [GeeksforGeeks](#), and TakeUForward, strengthening core data structures and problem-solving skills.
- First-authored "CampusConnect: A Centralized Web Platform for Discovering Student Opportunities," International Journal of Computer Science Languages (IJCSL), Vol. 4, Issue 2, 2026, STM Journals, ISSN: 3048-944X.
- Secured Top 40 at HackWithDelhi (2024); advanced to the online round of Code Veda 2025, competing among 6,000+ participants; also competed in Smart India Hackathon and Troubleshoot Ideathon 2025.
