

AYUSH SAREEN

MERN Stack Developer

+91-8368158779 • New Delhi • ayushsareen793@gmail.com • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building and deploying scalable MERN stack applications using MongoDB, Express.js, React.js, Node.js, and Next.js. Skilled in RESTful API design, JWT/OAuth authentication, and payment gateway integration, with production deployments via Vercel CI/CD.

TECHNICAL SKILLS

Languages:	C, Java, JavaScript (ES6+), TypeScript
Front-End:	HTML5, CSS3, React.js, Next.js, Tailwind CSS
Back-End:	Node.js, Express.js, REST APIs, OAuth Authentication, JWT, Razorpay Payment Gateway Integration
Database:	MongoDB, Mongoose ODM, MySQL
Tools & Platforms:	Git, GitHub, npm, VS Code, IntelliJ IDEA, Postman (API Testing), Vercel, Docker

EXPERIENCE

Web Development Intern, SkillCraft Technology

Jul – Aug 2025

Remote | skillcrafttech.com

- Developed event-driven interactive applications using vanilla JavaScript, applying DOM manipulation and state management patterns.
- Built fully responsive landing pages with CSS Flexbox and media queries, ensuring cross-browser compatibility across mobile and desktop viewports.
- Engineered a dynamic quiz application with real-time score tracking, conditional rendering, and local state persistence — concepts directly transferable to React state management.

PROJECTS

Travel-Log, Travel Journal & Discovery Platform

(Next.js, NextAuth, MongoDB, REST APIs) | [Live Demo](#) | [GitHub Repo](#)

- Architected a full-stack travel journaling platform using Next.js and MongoDB, enabling users to log destinations, document experiences, and share personal travel stories.
- Integrated NextAuth v4 with 2 OAuth providers (GitHub and Google) for secure multi-provider authentication.
- Debugged and resolved server/client component boundary and session-handling issues within the Next.js App Router, ensuring reliable user state across the app.
- Tested REST API endpoints for authentication and data flows using Postman, validating request/response reliability before deployment.
- Leveraged Vercel's CI/CD pipeline to iteratively deploy and test updates directly from GitHub.

GetMeACoffee, Creator Funding Platform

(Next.js, NextAuth, MongoDB, Razorpay, REST APIs) | [Live Demo](#) | [GitHub Repo](#)

- Developed a full-stack, responsive creator monetisation platform with a Tailwind CSS dark-theme UI, enabling fans to support creators via Razorpay's real-time payment processing.
- Built dynamic public creator pages using Next.js SSR for SEO-friendly, shareable URLs with real-time UI feedback.
- Engineered a scalable MongoDB-backed system spanning 3 core modules (user profiles, creator pages, transactions) via Next.js API routes.
- Validated REST API endpoints for profile and transaction flows using Postman, ensuring reliable request/response handling.
- Leveraged Vercel's CI/CD pipeline to iteratively deploy and test updates directly from GitHub.

EDUCATION

Greater Noida Institute of Technology (GGSIU)

Sept 2022 - June 2026 | Greater Noida, India

Bachelor of Technology in Computer Science Engineering

CGPA: 7.88 / 10.0

ACHIEVEMENTS

- Solved algorithmic problems consistently across [LeetCode](#) and [GeeksforGeeks](#), strengthening core data structures and problem-solving skills.
- Authored a research paper, "Campus Connect: A Centralized Platform for Discovering Student Opportunities", under review, publication in progress.
- Secured a Top 40 finish at HackWithDelhi Hackathon (June 2024) among hundreds of participants, and advanced to the Online Round of Code Veda 2025 among 6,000+ participants; also competed in Smart India Hackathon 2025 and Troubleshoot Ideathon 2025, totalling 4 competitive events across 2024-2025.
- Completed Full Stack Web Development Bootcamp, Udemy (2025).
